

UCMAS NEXUS

The 3-Day Abacus Awareness Camp For 4-13 Year Old Children

Experience the world's most powerful child brain-development system — **LIVE!**

Aligned with
India's **National
Education Policy**
(NEP 2020)

The **UCMAS Nexus 3-Day Camp** aligns with **NEP 2020** (Sections 4.23, 4.4, 4.6, 4.7 & 4.31, 4.33), promoting **experiential, joyful, competency-based, and holistic learning** through **Abacus-driven brain development**.

UCMAS Nexus is a **hands-on, three-day learning experience** where **children, parents, and educators** witness how **brain development** happens through the **power** of the **UCMAS Abacus program**.

UCMAS Nexus is the **link** between **classroom learning** and **cognitive awakening**.

UCMAS (Universal Concept of Mental Arithmetic System) is a **globally recognised brain development program** for children.

“ Through our unique **6-Finger Abacus Technique** and **whole-brain training approach**, we help children enhance **focus, memory, visualisation, listening skills, and mental math abilities**.

At **UCMAS**, we believe every child has **limitless potential!**

Our **scientifically designed program** doesn't just teach **mental math** — it builds the **foundation** for **lifelong learning, sharper focus, faster thinking, and stronger confidence**. By **training both sides of the brain** through the **Abacus method**, we prepare children to **excel academically and thrive in life**. ”

Prof. Dr. Dino Wong
President & CEO, UCMAS Global (Malaysia)

80+ Countries

6000+ Centers

30,00,000+ Students Trained

India Head Office: K-10 Grand, Sarabhai Campus, Subhanpura, Vadodara, Gujarat - 390007
(Operating in India across 28 states)

Odisha HQ: MIG-135 (1st Floor), Anant Vihar (Phase-II), Bhubaneswar, Odisha - 751020

North-East HQ: 178, Swagatam Path, Rajgarh Road, Guwahati, Assam - 781007

Whole Brain Activation + 6 FingerTips Stimulation

Every **abacus movement** throughout the **UCMAS** program **engages both hemispheres** of a **child's brain**.

Left Brain

Handles **Logic & Calculation**

Right Brain

Manages **Imagination & Pictorial Memory**

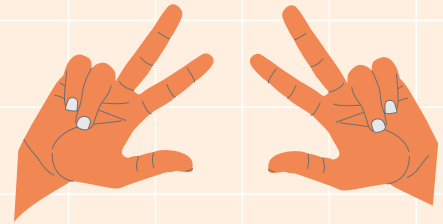

By using the **UCMAS's unique 6-finger technique** on the **abacus**, children trigger **bilateral activity**—each **hand stimulating** the **opposite sides of the brain**.

This **cross-communication** strengthens neural bridges and creates **faster, more balanced thinkers**.

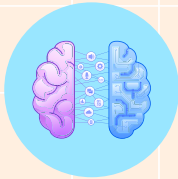

Thousands of **sensory nerves** lie at the **fingertips**.

During the **3-Day Camp** across multiple **UCMAS activities**, every **bead a child moves** sends a **burst of electrical signals** to the brain's **sensory centre**, **heightening alertness** and **concentration**.

The **result** is visible: **children increase their focus, coordination** and become **mentally energised**.

What's the purpose of UCMAS Nexus ?

Showcase how **Abacus-based learning** activates **both sides of the brain**

Empower children to **experience joyful learning** that **transforms their approach to study**

Educate **parents** on the **science** behind **focus, visualisation** and **memory**

Empower **communities** with **world-class brain development** for every **child**.

What's inside the UCMAS Nexus 3-Day Camp

Day 1

Children explore the **Abacus** through **touch, rhythm, and curiosity**.

It's the **day their fingers and brains begin to work as one**.

- **UCMAS Abacus introduction** and **guided bead play**.
- **6-Finger alignment** and **sensory coordination**.
- **Counting** and **speed-writing**.
- **Flash-card** and **basic (+/-) activities**

Practice sessions that make **learning joyful**.

Day 2

Focus deepens and **confidence** starts to **bloom**.

Children begin to **think faster** and **visualise numbers mentally**.

- **Guided bead calculations** using **both hands (6-Finger Technique)**
- **Oral** and **mental-math callouts**.
- **Flash-card speed rounds** and **random-number games**.
- **Visualisation** and **quick-recall exercises**.

Noticeable gains in **attention, accuracy, and coordination**.

Day 3

Learning turns into **performance** as **parents witness real transformation**.

- Start doing **math sums mentally** - *without any formulas*.
- **Speed-writing** and **memory challenges**.
- **Practice sessions** that make *learning joyful*.

Parents' Day on Day-3:
LIVE Showcase by children!

Children display **sharper focus, stronger confidence, and pure joy** in **learning**

Benefits of UCMAS Nexus 3-Day Awareness Camp

Learn the **basics** of **UCMAS Abacus techniques**

Builds **sharper concentration** and **active listening**.

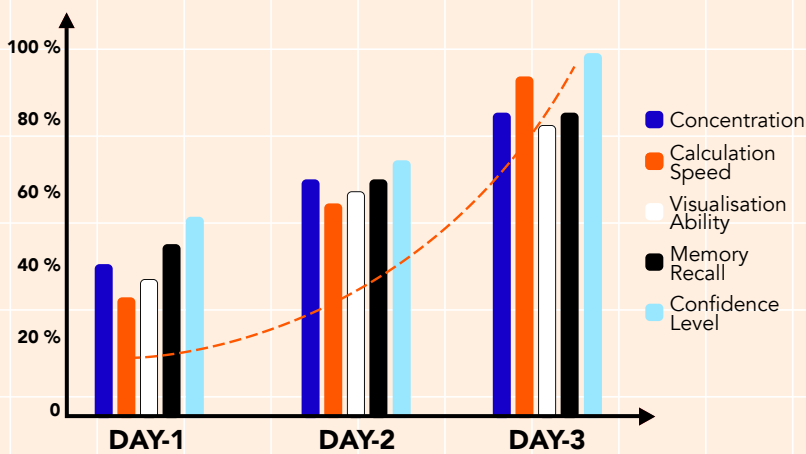

Improves **visual memory** and **creative problem-solving**.

Strengthens **logical thinking** and **academic performance**.

Boosts **self-esteem** through **live demo** in front of **parents**.

Progress during the 3-Day Camp

The UCMAS Nexus CHALLENGE

$$31 + 35 + 93 - 26 - 71 + 65 = ?$$

A **regular child** takes **30–40 seconds** to solve this.

A **UCMAS-trained child** answers in **under 5 seconds** — **mentally** — *without a calculator!*

That's **not magic** — that's **neural activation** in action.

Visible changes after the 3-Day UCMAS Nexus Camp

"In three days my son went from hesitant to confident — the 3-Day UCMAS Nexus truly works!"
— **Parent**

"I thought three days was too short to make a difference, but watching my child perform on the last day changed my mind completely."
— **Parent**

As a teacher and parent, I could see how UCMAS Nexus brings NEP-based learning to life — focus, joy, and real understanding
— **Franchise**

Day 1

Day 3

Focus & attention rise visibly—children **stay** on task longer.

Day 1

Day 3

Mental-math gets faster—answers arrive in **seconds, mentally**.

Day 1

Day 3

Confidence grows—kids perform **happily** in front of **parents**.

Day 1

Day 3

Listening improves—instructions **convert** to **action** quickly.

Day 1

Day 3

Curiosity spikes—they seek **tougher challenges**, *not shortcuts*.

After the short **3-Day UCMAS Nexus Camp**, children can **continue** their **journey** through the **UCMAS Program**, deepening the **skills** introduced here.

UCMAS Nexus & NEP 2020

A Perfect Alignment in Action

Experiential Learning

Hands-on Abacus activities where **children learn by doing**.

Joyful Learning

Games and group challenges make **math playful and social**.

Skill-Based Growth

Builds **concentration, logic, and memory** beyond **rote methods**.

Holistic Development

Activates both hemispheres for **balanced cognitive growth**.

Parent Partnership

Day-3 performances turn **parents** into **active witnesses** of **progress**.

UCMAS Nexus turns policy into practice – learning that is joyful, meaningful, and measurable.

The UCMAS Nexus Promise

Every bead moved, every flash card flipped, every smile during the 3-Day Camp is a signal of growth.

Through **UCMAS Nexus**, **children** discover that **learning isn't about memorising**—it's about **thinking, visualising, and believing** in their **own brilliance**.

UCMAS Nexus is the **bridge** between **curiosity** and **capability**—between **imagination** and **intelligence**.
